

Shatterproof LED tubes

Sunlite LED T8 Plug and Play Shatter Proof Lamps are extremely energy efficient and will greatly reduce your energy costs. These lamps can last up to 50000 hours making them virtually maintenance free. They contain no mercury elements and do not release any hazardous gasses so there no need to worry in case a bulb breaks and no need for any special recycling as with CFLs. With their high efficiency, their low wattage does not mean you lose out on brightness. These lamps are perfect for illuminating your living room or most cutting edge, state of the art, lighting design projects. Simply remove and replace current T8 bulb, there's no need to remove current ballast from fixture. Compatible with most electronic instant-start T8 ballasts. See sunlite.com website for installation instructions.
